

Keeping creativity flowing during lockdown and beyond

**Project:** Dragonfly

**Crafted by:** Joan

### What you'll need

- 1 blue felt
- 2 small piece of black felt
- 3 green felt - 3 pieces + 4 small pieces
- 4 circle of yellow felt
- 5 milk bottle shaped to look like 4 wings
- 6 garden wire for tail/body/head/legs/antenna
- 7 googly eyes

## How to:

### Dragonfly

.....

Cut wire and fold in 2 to form tail, body and head. Sew blue felt and keeping the sewing inside turn it the right way to form tail.

Then put over the wire and stuff to give it a bit of padding. Cut black felt and glue inside blue felt with forked end.

Sew green felt for body, keeping sewing on outside, turn right side out, pull over wire and stuff, gather and attach to tail.

Sew 2 semi circles of green felt for head, keeping sewing inside, turn right way and put onto wire, stuff and gather. Attach to body.

Feed 3 pieces of wire through body for legs and 1 piece through head for antenna.

Attach wings to body by sewing a piece of green felt to the centre of the wings. The wings should be marked first to accentuate the 4 wings and folded in the middle. Glue the wiggle eyes to each side of the head. Glue a yellow circle under the antenna.

Glue 2 small heart shaped green felt together and then glue to head. Put teeth markings on. Put horizontal stripes on tail.
