**Project:** Frog

**Crafted by:** Joan

**Skills learnt:** Sewing / gluing / shaping  
/painting

## What you'll need

(All sizes in **cm** and approximated)

- 1 green felt pieces - body 16x9, head 7x5, back legs 14x4, front legs 12x4, feet 7x0.5cm, webbing for feet 3x3
- 2 garden wire for head/legs - inside head 8cm, back legs 28cm, front legs 18cm
- 3 yellow felt circles
- 4 pipe cleaner/brown foam
- 5 foam scourer & stuffing
- 6 brown/black marker pen
- 7 green thread

## How to: Frog

### About the artist:

Joan is a regular attendee at the Glasshouses Open Art Studio.

.....

Cut foam scourer to form the body. Fold the felt over and cut to the shape of the body. Sew felt in the middle, flip over and insert scourer.

Sew 2 felt pieces for head - rounded at one end - and add a bit of stuffing. Insert wire with small loops at the sides. Attach body to head with glue.

Glue pipe cleaner/brown foam onto yellow circles and glue onto head where wire is sticking up. Cut garden wire for legs and feed through the body then bend back to form legs.

Fold two long green strips over wire and glue in place to form front legs; repeat for back legs. Note back legs are longer than the front ones!

Cut 8 small strips of green felt to form the feet, 2 for each foot. Fold into triangle shapes and gather at top.

Cut and shape small pieces of green felt to form webbed part of foot; i.e. slightly curved at the bottom to sit between the V shape of the feet. Glue to back feet and repeat for the front feet.

Mark dots all over the frog with brown or black marker.

Bend rear legs towards the front of the frog, and front legs at 90° facing forwards.
